

Appendix 1

**Bottled Water Survey results**

**A note by the Deputy President (Welfare)**

An online survey was created to gather student opinion on bottled water provision on campus, and run from the 21<sup>st</sup> February – 7<sup>th</sup> March with 703 responses. The results are below with a summary of what the results suggest we do.

1. College and the Union both sell bottled water at their catering outlets on campus. College sells a limited number of brands, and the Union stocks several brands. We are conducting this survey to gauge student opinion on whether bottled water provision should be reduced in an effort to reduce Imperial's environmental impact. Please indicate your preferred option below.

2. If we introduced more water fountains to campus, would you use them?

3. If we sold reusable water bottles on campus, would you buy them?

4. At which price point would you buy a reusable bottle (please select multiple answers if relevant).

What the answers suggest we do:

- Sell one brand of bottled water in all our outlets (this brand will be OneWater, the proceeds of which go to build wells in Africa)
- Increase the number of drinking water fountains available or raise awareness of existing ones as appropriate, encourage College to do the same
- Make reusable water bottles available in our outlets at a price which our students find reasonable
