

ICSMSU Pre-Hospital Emergency Medicine and RCC Wilderness Medicine Merger

The union notes:

- There currently exists two societies, ICSMSU Pre-Hospital Emergency Medicine (PHEM) and RCC Wilderness Medicine
- Both Societies currently exist with similar mandates: to expose interested parties to medical care outside of the hospital
- Both society committees and both management group chairs recognise an interest in merging the two societies

The union believes:

- A merging of the two societies under one name would offer students the easiest way to get true exposure to non-hospital medicine.

The union resolves to:

- Allow for a full merger of RCC Wilderness Medicine and its assets into ICSMSU Pre-Hospital Emergency Medicine
